Subject Index of Volume 148

Abrasion
a study of the abrasive wear of carbon steels, 101
abrasive wear of discontinuous SiC reinforced aluminum alloy composites, 287
Adhesion
adhesion wear mechanisms under dry friction of titanium alloys in vacuum, 203
Alloys
abrasive wear of discontinuous SiC reinforced aluminum alloy composites, 287
adhesion wear mechanisms under dry friction of titanium alloys in vacuum, 203
Aluminium
friction of metal sliders on toughened zirconia ceramic between 298 and 973 K, 147

Ball bearings
improvement of ball bearing performances, 295
Boundary lubrication
dynamics of dual film formation in boundary lubrication of steels Part I. Functional nature and mechanical properties, 305
dynamics of dual film formation in boundary lubrication of steels Part II. Chemical analyses, 329
dynamics of dual film formation in boundary lubrication of steels Part III. Real time monitoring with ellipsometry, 347

Carbon
abrasive wear of discontinuous SiC reinforced aluminum alloy composites, 287
dry friction and wear of self-mated sliding couples of SiC–TiC and Si_3N_4–TiN, 377
Carbon steels
a study of the abrasive wear of carbon steels, 101
Ceramics
effect of whisker orientation on the wear behaviour of a SiC/Al_2O_3 composite, 171
resistance of Si_3N_4 ceramic tools to thermal and mechanical loading in cutting of iron alloys, 69
wear and microstructure in fine ceramic coatings, 221
Chemical analysis
dynamics of dual film formation in boundary lubrication of steels Part II. Chemical analyses, 329
Coatings
wear and microstructure in fine ceramic coatings, 221
Composites
abrasive wear of discontinuous SiC reinforced aluminum alloy composites, 287
effects of steel counterface roughness and temperature on the friction and wear of PE(E)K composites under dry sliding conditions, 235
tribological behaviour of unfilled and composite polyoxymethylene, 363
Contact parameters
prediction of contact parameters using ultrasonic method, 181
Copper
friction of metal sliders on toughened zirconia ceramic between 298 and 973 K, 147
Copper–zinc–aluminium alloys
friction and wear of unlubricated copper-based CuZnAl shape memory alloys, 113
Counterface roughness
effects of steel counterface roughness and temperature on the friction and wear of PE(E)K composites under dry sliding conditions, 235

Dry friction
dry friction and wear of self-mated sliding couples of SiC–TiC and Si_3N_4–TiN, 377

Elsevier Sequoia, Lausanne

Dry sliding
effects of steel counterface roughness and temperature on the friction and wear of PE(E)K composites under dry sliding conditions, 235
Dual film formation
dynamics of dual film formation in boundary lubrication of steels Part I. Functional nature and mechanical properties, 305
dynamics of dual film formation in boundary lubrication of steels Part II. Chemical analyses, 329
dynamics of dual film formation in boundary lubrication of steels Part III. Real time monitoring with ellipsometry, 347

Elastic contact
a numerical model for the elastic contact of three-dimensional real rough surfaces, 91
Elastic–plastic two-layer half-space
finite element analysis of an elastic–plastic two-layer half-space: normal contact, 47
finite element analysis of an elastic–plastic two-layer half-space: sliding contact, 261
Elastohydrodynamic lubrication
a new measurement method of oil film thickness in the EHL condition: the R–C oscillation technique, 39
Ellipsometry
dynamics of dual film formation in boundary lubrication of steels Part III. Real time monitoring with ellipsometry, 347

Finite element analysis
finite element analysis of an elastic–plastic two-layer half-space: normal contact, 47
Fretting
a study of fretting wear with particular reference to measurement of residual stresses by X-ray diffraction, 249
Fretting fatigue
effect of slip amplitude on fretting fatigue, 15
Friction
adhesion wear mechanisms under dry friction of titanium alloys in vacuum, 203
effects of steel counterface roughness and temperature on the friction and wear of PE(E)K composites under dry sliding conditions, 235
ESCA study on tribochemical characteristics of filled PTFE, 161
friction and wear of unlubricated copper-based CuZnAl shape memory alloys, 113
friction of metal sliders on toughened zirconia ceramic between 298 and 973 K, 147
Friction noise
friction-induced noise in screw-nut transmissions, 25

Graphite
the role of metallic stearate additions in solid lubricants, 1

Intersection asperity
a numerical model for the elastic contact of three-dimensional real rough surfaces, 91
Iron alloys
resistance of Si_3N_4 ceramic tools to thermal and mechanical loading in cutting of iron alloys, 69

Mechanical properties
dynamics of dual film formation in boundary lubrication of steels Part I. Functional nature and mechanical properties, 305
Metallic stearate
the role of metallic stearate additions in solid lubricants, 1
Microstructure
effect of whisker orientation on the wear behaviour of a SiC/Al_2O_3 composite, 171
wear and microstructure in fine ceramic coatings, 221
Molybdenum disulphide
the role of metallic stearate additions in solid lubricants, 1
Multi-layer metallic surfaces
finite element analysis of an elastic–plastic two-layer half-space: normal contact, 47

Nitrogen
dry friction and wear of self-mated sliding couples of SiC–TiC and Si_3N_4–TiN, 377

Oil film thickness
a new measurement method of oil film thickness in the EHL condition: the R–C oscillation technique, 39

Polyetheretherketone
effects of steel counterface roughness and temperature on the friction and wear of PE(E)K composites under dry sliding conditions, 235
Polyoxymethylene
tribological behaviour of unfilled and composite polyoxymethylene, 363
Power transmission
friction-induced noise in screw-nut transmissions, 25
PTFE-based polymers
ESCA study on tribochemical characteristics of filled PTFE, 161

Resistance
resistance of Si_3N_4 ceramic tools to thermal and mechanical loading in cutting of iron alloys, 69
Resistance–capacitance oscillation technique
a new measurement method of oil film thickness in the EHL condition: the R–C oscillation technique, 39
Rough surfaces
a numerical model for the elastic contact of three-dimensional real rough surfaces, 91

Shape memory alloys
friction and wear of unlubricated copper-based CuZnAl shape memory alloys, 113
SiC whiskers
effect of whisker orientation on the wear behaviour of a SiC/Al_2O_3 composite, 171
Silicon
abrasive wear of discontinuous SiC reinforced aluminum alloy composites, 287
dry friction and wear of self-mated sliding couples of SiC–TiC and Si_3N_4–TiN, 377
Sliding
finite element analysis of an elastic–plastic two-layer half-space: sliding contact, 261
Sliding metallic friction
an investigation of the role of low cycle fatigue in producing surface damage in sliding metallic friction, 135
Slip amplitude
effect of slip amplitude on fretting fatigue, 15
Solid lubricants
the role of metallic stearate additions in solid lubricants, 1
Stainless steel
external reflection FTIR, 31P MAS NMR and SEM study of the thermal decomposition of zinc(II) bis(O,O′-dialkyldithiophosphates) on 316 stainless steel, 123
Steel
effect of slip amplitude on fretting fatigue, 15
friction of metal sliders on toughened zirconia ceramic between 298 and 973 K, 147
Steels
a study of the abrasive wear of carbon steels, 101
dynamics of dual film formation in boundary lubrication of steels
Part I. Functional nature and mechanical properties, 305
dynamics of dual film formation in boundary lubrication of steels
Part II. Chemical analyses, 329
dynamics of dual film formation in boundary lubrication of steels
Part III. Real time monitoring with ellipsometry, 347
effects of steel counterface roughness and temperature on the friction and wear of PE(E)K composites under dry sliding conditions, 235
Stress
a study of fretting wear with particular reference to measurement of residual stresses by X-ray diffraction, 249
Surface roughness
surface roughness detection by tool image processing, 211

Thermal decomposition
external reflection FTIR, 31P MAS NMR and SEM study of the thermal decomposition of zinc(II) bis(O,O′-dialkyldithiophosphates) on 316 stainless steel, 123
Titanium
adhesion wear mechanisms under dry friction of titanium alloys in vacuum, 203

dry friction and wear of self-mated sliding couples of SiC–TiC and Si_3N_4–TiN, 377
Tool image processing
surface roughness detection by tool image processing, 211
Tribochemical behaviour
ESCA study on tribochemical characteristics of filled PTFE, 161
Tribology
tribological behaviour of unfilled and composite polyoxymethylene, 363

Ultrasonic methods
prediction of contact parameters using ultrasonic method, 181
Uni-directional sliding
an investigation of the role of low cycle fatigue in producing surface damage in sliding metallic friction, 135

Wear
a study of fretting wear with particular reference to measurement of residual stresses by X-ray diffraction, 249
abrasive wear of discontinuous SiC reinforced aluminum alloy composites, 287
adhesion wear mechanisms under dry friction of titanium alloys in vacuum, 203
dry friction and wear of self-mated sliding couples of SiC–TiC and Si_3N_4–TiN, 377
resistance of Si_3N_4 ceramic tools to thermal and mechanical loading in cutting of iron alloys, 69
wear and microstructure in fine ceramic coatings, 221
Wear behaviour
effect of whisker orientation on the wear behaviour of a SiC/Al_2O_3 composite, 171
Wear prediction
an investigation of the role of low cycle fatigue in producing surface damage in sliding metallic friction, 135

X-ray diffraction
a study of fretting wear with particular reference to measurement of residual stresses by X-ray diffraction, 249

Zinc(II) bis(O,O′-dialkyldithiophosphate
external reflection FTIR, 31P MAS NMR and SEM study of the thermal decomposition of zinc(II) bis(O,O′-dialkyldithiophosphates) on 316 stainless steel, 123
Zirconia ceramics
friction of metal sliders on toughened zirconia ceramic between 298 and 973 K, 147
